

MOUNTAIN LAKES RECREATION

ASTRONOMY EXPERIENCE NIGHT

Saturday, March 28, 2026

8:15 pm – 10:00 pm

- Telescopic views of the waxing gibbous moon
- Observe Jupiter and its moons
- International Space Station flyover (~8:30 pm, west to east; seen great with binoculars)
- Orion Nebula, Pleiades, Hyades, and Perseus star clusters
- Possible glimpse of Uranus
- An exciting and educational night under the stars
- Lead by Morris Museum Astronomical Society

Please bring: binoculars (if you have); flashlight to safely walk to field; and dress for the weather.

Location: Halsey Field, behind the Tennis Courts
